Current Job

Jul 2026 – Present

Research Assistant, Data Assimilation and Meso-scale Predictability Lab, Department of Atmospheric Sciences, National Central University (NCU), Taiwan.

- **Current Work:** Investigating data-driven afternoon convective nowcasting in the Taipei Basin using GNSS and surface observations.
- Maintaining a database of weak-synoptic warm-season dates in the Taipei Basin for 2001–2024.
- Developed a CNN-based classification model with self-distillation for estimating tropical cyclone 34-kt wind radii (R34) in the North Atlantic Basin.

Education

Sep 2022 – Jun 2026

B.S. in Computer Science, National Yang Ming Chiao Tung University (NYCU), Taiwan.
GPA: 3.95/4.30
Relevant Coursework: System Administration, Operating Systems, Database Systems, Image Processing, Weather and Weather Analysis (NCU).

Jan 2026 – Jun 2026

Exchange Student, Technical University of Denmark (DTU), Denmark.
Grade Average: 10.0/12.0
Relevant Coursework: Artificial Intelligence, Reinforcement Learning, Computational Data Analysis, Mathematical Modelling.

Research Experience

Jul 2025 – Aug 2025

Summer Project Intern, Meteorology Division, National Science and Technology Center for Disaster Reduction (NCDR), Taiwan.

- Developed an XGBoost-based typhoon track and intensity prediction model using IBTrACS and CNN-autoencoded ERA5 data.
- Achieved 24-hour and 48-hour track prediction errors of approximately 150 km and 340 km, respectively. [Project Website]

Sep 2024 – Dec 2026

Undergraduate Project Research Student, Computer Architecture and System Lab, National Yang Ming Chiao Tung University (NYCU).
Advisor: Prof. Tsung-Tai Yeh.

- Designed an adaptive pick-and-place robotic arm system integrating real-time object detection and SIMD-accelerated VAMP for obstacle avoidance.
- Used a keyword spotting model with denoising to capture real-time voice commands.

Skills

Languages — English and Mandarin Chinese: strong reading, writing, and speaking skills; German and Japanese: beginner proficiency.

Coding — Python, C++, JavaScript.

Technologies — Effective use of AI tools for coding, research, and problem-solving.

Misc. — Web development, academic research.

Miscellaneous Experience

Apr 2024 – Jun 2024 **Background Music Recommender,** Introduction to Artificial Intelligence course.
Developed a BGM recommender using CNN-based VGG19 model.

Dec 2023 **LINE Weather Chatbot,** Introduction to Databases course.
Built a chatbot providing weather information for four major regions of Taiwan.

Sep 2022 – Jan 2025 **NYCU Tennis Team Member.**
Demonstrated teamwork and team spirit through team participation.

2025 – Present **Volunteer, Stray Cat Shelter.**
Developed compassion for animals through feeding, grooming, cleaning, and administering medication.

2021 – Present **YouTuber with 3,400 Subscribers.**
Document typhoons and earthquakes in Taiwan while developing video editing skills. [YouTube Channel]

Honor Award

Dec 2025 **Bronze Medal, 4th Andes Cup RISC-V Creative Contest.**
NPU acceleration, YOLOv8, VAMP.

Dec 2025 **First Place, Six-City Rainfall Forecasting Competition, Taiwan.**
Weather and Weather Analysis course; achieved the highest Equitable Threat Score (ETS).
Numerical model output analysis, historical analog case identification, inspiration for future data-driven research.

Dec 2021 **Samsung Solve for Tomorrow: First Prize**
Cross-environment Automatic Beach-Cleaning Device
Hexapod robot, robotic arm, inverse kinematics.
